

## STRATHCONA NEWS

## STEPS FOR THE PROTECTION OF THE RIVER MILLS LUMBER.

The Matter Discussed and a Strong Resolution Passed Which Will Be Forwarded to the Members at Big Island.

A special meeting of the Board of Trade was held yesterday afternoon in the offices of the board to consider the reports of the lumbermen by the flood tides on the river and to take some steps to prevent such losses if possible.

The president, J. M. Douglas, was in the chair, and among those in attendance were Dr. Fuller, John Walker, Fred Sachs, J. F. Weir, Dr. Archibald, O. Bush, Scott Blackwood, J. Fraser, Robert Ritchie, W. J. Clift, John Gainer, H. M. Whiddington and A. G. Beal.

The question of taking steps to make the river safer for logs was discussed at considerable length by Dr. Fuller, Dr. Archibald, Scott Blackwood and John Walker. Mr. Walker said that after the floods of last year he had written the government and in answer had been sent up who did some surveying at Big Island and estimated the cost of constructing levees there at \$45,000. Nothing more had been done since. Seeing that practically every log that got past the mill was a dead loss the flood grates lessened the lumber supply here and increased the price of lumber. Mr. Walker said that all the available timber in Alberta at the present was not sufficient to put a decent shack on every homestead, and therefore none of it should be lost.

The following resolution moved by Dr. Fuller and seconded by Dr. Archibald, was then unanimously carried and copies ordered to be sent to Hon. Mr. Oliver, Dr. McIntyre, M.P., and T. A. Harrow, M.P.

Whereas the North Saskatchewan river from Edmonton west is one of the chief highways for the transportation of timber in Alberta.

And whereas, owing to the liability to sudden and heavy flood and the difficulties of holding logs at such flood times, it is an exceedingly treacherous and hazardous stream for such purposes, resulting in the loss of large quantities of timber annually—such loss amounting in 1907 to some 9,000,000 feet and in 1908 to some 10,000,000 feet (head measure) or a total loss in two years of approximately \$15,000,000.

And whereas, the areas of timber in Alberta are very limited and such losses result in an increased cost of lumber, and consequently a burden on the people and a great waste of a valuable material.

And whereas, owing to such heavy and repeated losses the local lumbermen are unable to cope with the situation.

Therefore be it resolved, that the Dominion government be memorialized to promptly make such improvements on the river and take such action as is necessary to prevent further loss.

## STRATHCONA'S FIRST GAME.

The Canmore Mail contains a column article on the first of the games of the Alberta Amateur Football League, which took place at Canmore between the team of that town and Strathcona this week. The result was a victory for Canmore, the score being 4 to 2. The following are the details:

Canmore.	Strathcona.
Dahl, 2b.....	4 0 3 10 1 2
Gunderson, c.....	4 1 2 14 1 2
Ellis, 3b.....	4 1 1 2 3 0
Price, ss.....	4 1 1 2 4 0
Farrall, p.....	4 0 2 0 2 0
Tanny, rf.....	2 0 1 0 0 0
Archer, lf.....	3 0 1 0 0 0
Abner, cf.....	4 0 1 1 0 0
Lamb, lb.....	3 1 1 7 0 0
Alcock, fr.....	2 0 0 1 0 0
<b>Total</b> .....	<b>24 4 10 31</b>

Strathcona.	ABR H PO A
Hall, 2b.....	5 0 1 2 0 1
McLaughlin, p.....	5 0 1 2 0 1
Carmichael, lf.....	3 1 2 0 0 0

Miller, c.....	4 1 1 0 0 0
Ball, lb.....	4 0 1 8 1 1
<b>Total</b> .....	<b>43 2 10 23 6 3</b>

Summary—Base on balls, 6; Foul balls struck out by Farrall 11, by McLaughlin 9; two base hits, Gunderson 2, Farrall, Abner, Maloney, sacrifice hits, Archer, stolen bases, Tanny; first base on errors, Strathcona 13, Canmore 2; left on bases, Strathcona 13, Canmore 7; hit by pitched ball, Dahl; double play, Grant to Ball on fly ball batted to right field.

## LOCALS.

At the baseball grounds last night, a keenly contested ball game was played between a team from the High School, captained by John Alton, and a team picked from younger city players and captained by P. Kossay. The High School won the score being 11 to 3. George Nightingale was referee.

Rev. Mr. Johnston, at present pastor of the Strathcona Methodist Church, has been transferred by the conference to Odie. His place here will be taken by Rev. H. E. Gordon, now stationed at Lacombe.

The Christian Endeavour Society of the Presbyterian Church will hold its 14th social at the residence of R. B. Douglas next Thursday evening. The band will be in attendance and an abundance of refreshments will be served during the evening.

The first ball game of the season will take place in Strathcona next Tuesday night, when the Edmonton team will play here for the first time. Bleachers are now being erected at the diamond and those who attend will see the game with greater comfort than previously.

Invitations have been issued for the marriage of G. W. Marriott, manager of the Canadian Bank of Commerce here, to Miss Gladys Rank of Victoria, B.C., and formerly a nurse at the Strathcona hospital. The ceremony will take place on June 30th. The marriage takes place in Edmonton next Tuesday of P. J. Walsh, of Strathcona, and Miss Eugenie De Gaster, trained nurse, of Edmonton. The ceremony will take place in St. Joseph's Church.

Thomas E. McLean has been awarded the contract for collection of mail from the new letter boxes to be placed in different parts of the city. No date has yet been announced for the beginning of the service.

W. J. Joy has been awarded the contract for the masonry in connection with the new government telephone building.

## ...KEELEY CURE...

It is a recognized principle of modern Medical Science, upon which are based the greater number of the successful triumphs of that Science, that every disease known to man has its own peculiar cure, and that for every disease of nature there has been provided one, and only one, real preventative. Drunkenness is a disease. Science has proved this. And until this fact was recognized man was unable to cope with this dread enemy and the fetters of this deadly habit had baffled the ablest minds. The one preventative of Drunkenness is the scientific treatment popularly known as the Keeley Cure. To this cure Drunkenness yields, and it really yields in nothing else. It is the one curative and preventative which Nature has provided for this disease. The Keeley Cure is eminently and thoroughly scientific. KeeleyCure succeeds where all else fails; during the last twenty-eight years over half a million persons have learned the advantages of the Keeley Cure. Keeley Cure is always administered in a Keeley Institute and nowhere else; no one else has the knowledge or right to administer it. In all Keeley institutes the treatment is the same and there are now fifty of these famous institutions letting the Anglo-Saxon world.

In Western Canada There is Only One Keeley Institute.

The Winnipeg Keeley Institute is located in one of the liveliest districts of the city—amid the popular groves of 404 Fort Dodge. Here you will find every comfort and convenience and be surrounded by the pleasant and most editing associations such as you would expect in a home of respect and refinement. A thoroughly qualified Physician who resides in the Institute gives his entire attention to the administration of the Keeley Treatment so that every patient who willingly submits to the treatment is confident of complete recovery.

## AMUSEMENTS

## "GRAUSTARK" MONDAY.

Harold Nelson will be the attraction at the Edmonton Opera House on Monday evening next, presenting for the first time in this city the dramatization of George Barr Mowbray's popular romance novel, "Graustark." The play follows closely the story contained in the novel, and is replete with thrilling

situations and laughable comedy. Mr. Nelson plays the part of a young baronet who visits Graustark in search of a fair-haired German girl, whom he had previously met on a train in the States. The German girl turns out to be a princess, and "they lived happily ever after." "Rich boys" will be given on Tuesday night. Mr. Nelson's greatest dramatic triumph has been made in plays of this order, and "Graustark" should prove a very enjoyable event.

## RAILWAY WRECK IN BELGIUM.

Five People Killed and Many More Were Injured.

Tournai, Belgium, June 12.—A railroad wreck near Tournai today resulted in the killing of five persons and the wounding of several others. A passenger train from Mons ran off the track and several cars were demolished. The wreckage immediately caught fire and was consumed. It was with much difficulty that the injured were removed from the wreckage before the flames reached them.

### THREE OF EDMONTON'S THRIVING INDUSTRIES

The Alberta Lumber Company, the Edmonton Bottling Company and the Edmonton Concrete Company are all running to capacity—All on well-established footing.

#### THE ALBERTA LUMBER CO., LTD.

Among the industries of Edmonton that have had a rapid growth from small beginnings and are now characterized by enterprise and continued progress, is the Alberta Lumber Co., Ltd., situated on the eastern end of the city. The company took over the lumber yard from F. M. Davis in April, 1924. At that time it was in its infancy, the stock consisted of about \$2,000 worth of lumber, etc., and one warehouse. The entire business was handled by two men in the office, one yardman and one team.

Mr. Davis continued in the position of manager until September, 1925, and in the period there was rapid growth, but the company took over a small office and saw factory from Charles May, and then employed about ten men.

Since that time the capacity has been doubled twice, once in 1925 and again in 1926. Last year the company paid out thirty men, and the average pay roll amounted to \$100,000 in 1925. From 1924, when one team served all the purposes of the establishment, there was an increase until midwinter of last year, when ten teams and six sawyers and husks were employed to meet the largely increased demands.

From one yardman in 1924 the business has increased to one foreman, five checkers, and ten sawyers. In 1925 the sales of the Alberta Lumber Co., Ltd., amounted to \$250,000, and in 1926 to \$250,000, almost a quadruple increase in a period of two years.

In May, 1927, a branch was opened in Vancouver to accommodate the needs of the northern part of the city. This has done an ever increasing business, and there is an excellent prospect for the present year.

The factory is in the hands of J. R. Perrie, and the general manager of the Alberta Lumber Co., Ltd., is H. R. Robertson.

#### EDMONTON BOTTLING WORKS.

The Edmonton bottling works, manufacturers of aerated waters, is owned and operated by F. A. and H. R. Neher. The proprietors have been in the Edmonton high Wisconsin in the late part of 1925, with their capital, Mr. Neher, an experienced brewer and soda water manufacturer, who has the opportunity after his return to Edmonton and the surrounding country. He at once erected a new building and installed machinery with a capacity of 120 dozen per day. The sales for the first year were \$1,100, but were gradually growing. In 1925 C. M. Neher, owner and present owner, F. A. and H. R. Neher took charge. At this time the factory was enlarged to four times its old size to meet the growing demand. The sales for 1927 totaled \$25,000. The floor space of the first factory in 1926 was 200 square feet, and the floor space of the present factory is 2,500 feet. With the ever-increasing growth of the city the first year's expansion was the last to the largest trade in its history.

#### EDMONTON CONCRETE CO., LTD.

Mr. A. Patterson, the manager of this progressive company, came to Edmonton from Smith's Falls, Ont., in 1920. The company was brought into existence by the demand of some of the leading local contractors, who thought concrete blocks would be a suitable substitute for brick or stone especially in a place and at a time when both were very scarce.

The concrete blocks which the company turn out at their yards at the foot of the hill near the Edmonton hotel, in many sizes and shapes, are very little inferior to stone. The blocks are hollow in order to allow the air to circulate in the walls.

Piping is also manufactured by this same process in sizes from six to thirty-six inches, the company having had no less than three miles of pipe, and have supplied large quantities to local plumbers.

This year the company will employ about thirty-five hands. The factory is filled with a perfection block-making machine, which is operated by a ten horsepower motor, the electricity of which is supplied by the city. Each block, which is composed of sand and concrete, receives one hundred tons pressure, after which it is removed to a steam room, where it remains for thirty-six hours. The curing is then finished off by the aid of the sun and the water, the last being supplied by hot water from the city. Several residences in and around Edmonton have been built with these blocks, and also two public schools north of the city. The company also ships to various points along the railway line running out of Edmonton.

#### Wants Credit For Penny Postage.

London, June 12.—William P. Nield is apparently of opinion that he was very badly treated when he was notified of service due to him in bringing about the penny postage with the United States was a matter of the lion's share of the credit went to John Housner Mott and his associates. Nield has written letters to all the papers recalling his own efforts. In 1920 he joined an appeal to the public in favor of a penny post for all English-speaking communities, and after an address to Queen Victoria, which was signed by 15,000 persons. "Eighteen years have passed," he writes, "before the penny expressed in our nation has been granted."

Thus blithely does he attribute to himself all the honor.

#### NO MORALITY QUESTION.

In the Yukon Says Commissioner Henderson in Vancouver.

Vancouver, B.C., June 12.—"One of the most important of the proposed amendments to the 'Place Mining Act,' said Commissioner Henderson, of the Yukon, deals with the question of safety. The amendment provides that no matter whether a water record has been granted, there shall be provisions made for a flow in the natural bed of the creek, should there be any danger of flooding." The amendment is a morality question that is supposed to be seriously affecting the northern region, he said. The Yukon is situated particularly on the same footing as British Columbia in the matter of morality. The conditions there are not different in any real sense from conditions existing here. It would be useless to talk further on the matter, because there is really nothing to discuss. There is no morality question in the Yukon.

Mr. Henderson stated that the most important legal legislation pending in the Yukon is the revision and consolidation of the liquor license act. Various amendments had been made from year to year, one of the most drastic being the closing of dance halls in 1927. The act was now meeting general requirements. No further drastic changes were contemplated. With respect to his visit to Ottawa, Mr. Henderson expressed satisfaction. Among the matters to which he gave attention was the proposed amendment to the placer mining act, which will create a wholly elective council instead of as at present a council of five elected and five appointed. No hitch has so far arisen in connection with this change. The amendments to the placer mining act have been nearly all suggested by the mining committee of the Yukon council, and as the suggestions are in the interests of the public they have been received with favor at Ottawa.

An amendment to the quartz mining regulations will be introduced by a order-in-council which will relieve the prospectors from the necessity of giving the affidavits of two witnesses in order to verify the work he has done on the claim, which will be given to prospectors in remote districts. The suggestion was also made by the same committee.

Mr. Henderson will go north in a few days.

#### CHURCH SERVICES.

All Saints Church—Holy communion morning prayer, Rev. C. C. McDonald, 11 a.m.; Sunday school, 2 p.m.; evening prayer and sermon, Rev. C. C. McDonald, 7 p.m. St. George's Church—Rev. R. J. H. L. Schulz, pastor, 11, Nelson avenue.

Bethel Mission, Third street, will be service morning, afternoon and evening at Bethel Mission tomorrow.

#### A Marvellous Improvement.

It has remained for Canada to give to the musical world one of the most important inventions of the century. This is the Harmonic Tone-Producing Bridge, which is so marked a feature of the New Scale Williams Piano as to bridge isolates the tone from the plate, and makes each note clear and distinct. Those who have listened to the full, rich, mellow, ringing tone of the New Scale Williams Piano can testify to its quality volume and carrying power.

New Scale Williams Piano is perfectly balanced—triple malleable and has being long and properly proportioned. It is a feature in concert work, and is highly praised by artists.

Harmonizer of the famous "Black White" Band says: "The tone is more like a true grand than any other piano." An Harmonic Tone-Producing Bridge is but one of many valuable features in these—Canada's Best piano.

W. A. PRATT & CO., Agents.

#### GRAND TRUNK RAILWAY SYSTEM.

THIRTY DAY AND SEASON tickets now on sale at all points in Eastern Canada.

#### NEW ENGLAND STATES.

Choice of routes, via St. Paul, Chicago and GRAND TRUNK RY., or Port Arthur, Northern Railway, and Grand Trunk. Free Side Trips to Niagara Falls and Ottawa on certain dates.
